

SD3

AUTOMATIC BEVLLING-SERRATION MACHINE

SD3 machine's function is to perform serrated edges on knives. The grinding wheel, which is shaped by the diamond coated dressing roll, is always straight. The serrated edge is executed by means of tracer scale 1:1, following the geometry of the knife. Different models of serrated edge can be performed with the same grinding wheel by changing the tracer. The machine is available with lineal or chain tool magazine.

SD3

	Diameter of grinding wheel (mm)	300
	Serration power	11
	Serration length (mm)	165
	Number of CNC axes	2
	Approximate weight (Kg)	1800
